High Spec Low Cost Lifter Series

AGE415-09 & AGE56-12 Pneumatic lifters

● Small, but Powerful!

While weighting only around 30kgf (AGE415-09 = 30.5kgf, AGE56-12 = 36kgf) these lifters can lift up to a massive 150kgf [1.47kN], around 5 times their own weight.

Warning: For safety reasons for heights over 3.8m the load weight should not exceed 50kgf.

● Easy to transport & Ready to use in seconds!

Their light compact design makes these lifters easy to carry and transport. At your work site just click open the support legs and attach the gas bottle. When your work is over simply detach the gas bottle and at the pull of a string the support legs easily fold up ready to go the next job site.

● No on site electricity?

No problem!

Both the AGE415-09 & AGE56-12 are 100% pneumatic and requires no additional power, operating on either compressed air or CO₂ gas, so there is no need for extra power cables to trip over. Being pneumatically powered our lifters have the added benefits of being easy to maintain and cost very little to run.

● Need to work close to walls?

No problem!

Agetaro's double jointed double caster support legs enable you to fold a support leg up where necessary to get right up next to any wall.

● Low base height for easy loading!

At only 90cm the AGE415-09 boasts the lowest base loading height of its type (120cm for the AGE56-12) making them very easy to load and safer to use.

● Simple Handheld Controller

Raising and lowering operating controls are simple and easy to use.

▲ Raising lever

▼ Lowering valve

◀ Safety relief valve

Max lift height: 5,600mm (AGE56-12)
4,150mm (AGE415-09)

Agetaro Jr.

SWL27-09 Wire lifter

This no fuss wire lifter is perfect for those smaller lifting jobs!

● **Light & Compact**

Lighter and more compact than its larger pneumatic brothers, weighing around only 18.6kg, makes it very easy to carry and transport. These features also make it ideal for work in places like apartment building verandas and other narrow spaces where a large lifter just wouldn't fit, making it perfect for jobs such as air conditioner installation or removals.

● **Small, but Powerful!**

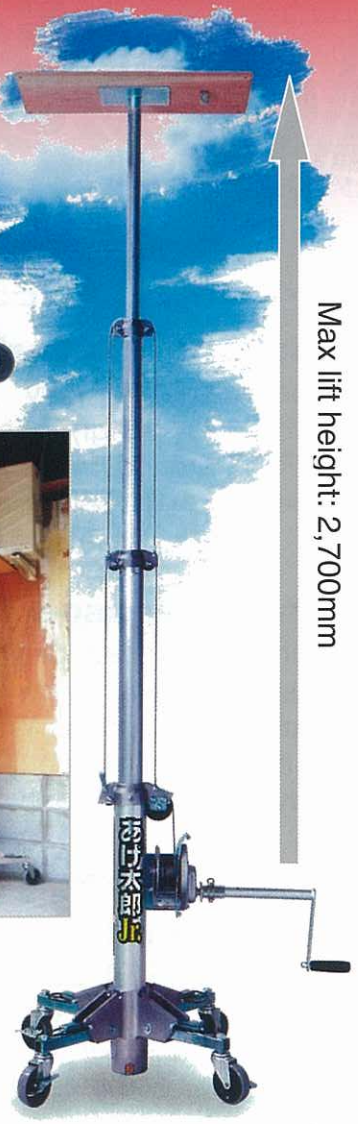

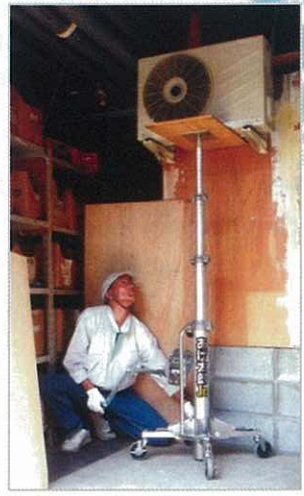

This lifter allows you to effortlessly lift up 70kgf [0.69kN] up to a height of 2.7m. Requiring neither gas nor electrical power it is the perfect eco-machine.

● **Safe Singlehanded Operation**

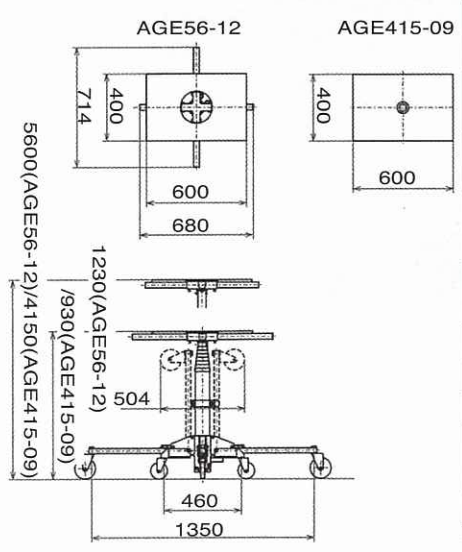

The safety brake attached to the operating handle locks automatically when released allowing you to continue with the job at hand and making it the perfect partner for the solo-tradesman or electrician.

● **Maneuverable!**

Casters make maneuvering easy particularly in narrow work spaces.

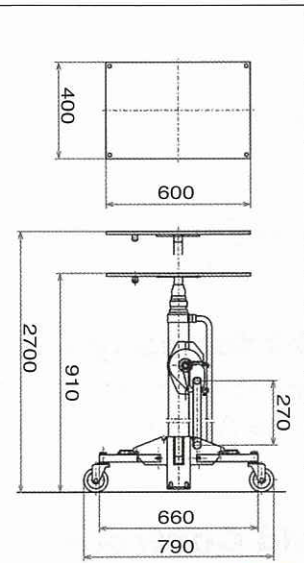

Max lift height: 2,700mm
